LOAD CAPACITY

These shelves can take a LOT of weight. However, the exact weight rating of each wall shelf depends primarily on the following factors –

- How it is attached to a wall (e.g. the type/size of screws, bolts and/or wall plugs)
- The type of wall you are fixing the shelf to – plasterboard, concrete, single or double wall, etc.

A shelf mounted to something solid (like wall studs or masonry block) will maintain a much higher weight capacity than a shelf fixed to Gyprock, for example.

Please Note: Longer wall shelves have a middle bracket for extra strength, please ensure you fit these.
