

# Coolroom/Dry Store Shelving

**OVER 70,000+ SOLD**

## Chrome or Epoxy?

Chrome looks absolutely fantastic but is a little more expensive. A reflective silver surface that reflects light and gives off an aura of sophistication – so they are commonly used in retail areas where they need to look good.

The epoxy resin is a rubberised coating. That makes them highly water resistant. So they are excellent for coolrooms or refrigerated environments. And cheaper too.

**The very familiar shelving system at a not-so-familiar price.**

**Strong**  
Thicker diameter steel than most competing systems.

**Each set comes with 4 shelves**  
Shelves adjust to anywhere along the length of the poles. Extra shelves are available. See pricing below.

**Castors available**  
Castors are supplied as a set of 4, \$45 or heavy duty \$72.

**Adjustable feet**  
Coolroom shelving is perfect for uneven floors with adjustable feet.

**Up to 150kg load capacity**

Code: SH1818EP  
457 x 457mm \$149

Highly water-resistant epoxy rubberised coating

Code: SH1872CH  
1829 x 457mm \$294  
Set of 4 castors \$45

Code: SH2448EP  
1219 x 610mm \$229

Our special black clip clicks under the shelf. Stops the shelf from sliding down - strong!

## Shelving FAQs

**How do you put them together? Can I put the shelves at any height?**

Each shelf comes with four clips. Simply snap lock them onto the grooves on the upright posts. Slide the shelf over the post until they hit the clip, apply a bit of pressure and the shelf is locked in place. You can put the shelves anywhere along the upright to suit the required shelf height.

**Can I buy extra shelves?** Of course you can! Most people don't as four is generally a good number for an 1800mm high post. If you want extras, they are 25% of the total price of a set.

**What are the load capacities of wire shelving?** Load capacities are 150kg per shelf. For shelving with wheels the overall weight capacity of the shelf unit is 240kg (SHWHEELS \$45) or 320kg with the heavy duty wheels (SHWHEELS-HD \$72).

Higher capacity shelving (up to 250kg) is now available with the Premium Range on page 10 of our downloadable catalogue.

**What if I have an uneven floor?** Each post has a small adjustable foot. Simply screw it out to level your shelves on an uneven floor.

**How are these shelves made?** These shelves are made of steel, then dipped in either chrome or an epoxy resin.

Code	PRICE*
SHWHEELS Set of 4 Castors	\$45
SHWHEELS-HD Set of 4 Heavy Duty Castors	\$72

## NEW More Options for Epoxy & Chrome Shelving

Create straight, L or U-shaped shelving.

Connect your shelving bay to another bay with these handy epoxy or chrome hooks. For an L-shaped bay, use 1 complete shelf unit and 1 unit with just 4 shelves and 2 posts. Connect the shelves onto the full bay with 8 hooks (2 per shelf).

You will need 2 hooks per shelf. Simply hook onto the shelf of the complete bay and lift the shelf of the next bay into the hook. Firmly push into place.

Load capacity is 150kg per shelf – this includes the complete shelf across both bays. Please ensure weight is evenly distributed across the shelf.

No corner post. Easier access. More storage space.

## Connection Hooks

Code	PRICE*
S-HOOKSEP Set of 2 epoxy hooks	\$2
S-HOOKSCH Set of 2 chrome hooks	\$2

\*Prices include GST. Prices vary due to raw material and exchange rate fluctuations and are subject to change without notice.
